Nassir Pedraza Cespedes

971-269-5919 | nassirpc@gmail.com | Corvallis, OR

Summary

My name is Nassir and I am a junior at Oregon state. I am currently pursuing a bachelors degree in computer science. I feel fortunate to have had exceptional coursework and hands-on internship experiences that have shaped me into the software engineer I am today. I am passionate about solving complex problems, leveraging technology, and embracing leadership opportunities. I am eager to continue growing while contributing to meaningful and positive change throughout my career.

Bilingual, Software development, Communication skills, Customer service, HTML5, CSS, MySQL, Computer literacy, APIS, Leadership, Agile, GIT, Javascript, C#, React, Express.js, Bootstrap, Python, Node.js, Scrum Software Development, CI/CD, Full Stack

Experience

Transcribbit | Corvallis, OR
Internship Experience | 09/2024 - 02/2025

- Proactively generated leads and pitched Transcribbit's AI-powered transcription service through cold calls and outreach, demonstrating strong communication and sales skills
- Contributed to the maintenance and optimization of the company website, ensuring a high level of functionality and usability for users.
- Documented technical work and collaborated closely with the team, consistently learning and applying best practices to enhance technical expertise and overall project efficiency.

Oregon State University | Corvallis, OR
Team Leader | 04/2024 - 02/2025

- Led team of 7 developers to successfully design and deploy a web application that optimizes students' class schedules and walking routes, ensuring seamless collaboration throughout the project.
- Managed the full SDLC, guiding the team in using React, Python, and MongoDB to deliver a high-quality, fully functional web app that exceeded performance expectations.
- Implemented a robust CI/CD pipeline using GitHub Actions, automating testing and deployment to enhance development efficiency and minimize errors.
- Received positive feedback from team members for strong leadership, effective communication, and the successful delivery of the project on time, with a focus on quality and innovation.

Oregon State University | Corvallis, OR
Teaching Assistant | 01/2023 - 01/2023

- Fostered a supportive learning environment by implementing effective discipline strategies and guiding students in computer science studies.
- Collaborated with professors and fellow TAs to evaluate and improve student code submissions, ensuring alignment with academic standards.
- Mentored students in coding best practices, promoting high-quality software development and problem-solving skills.
